

**Let's bring smart contracts  
to everyone together!**

# **Why smart contracts are our future?**

Automatic execution

Immutable terms

Irrevocable transactions

Infrastructure cost savings

# **But there is a big gap in the ecosystem**

Available only for programmers

Programmers have to maintain a full node

No convenient management tools

No links to real world things

# What is Smartz?

Marketplace of smart contracts – **for all**

UI generation standard – **for developers**

Dashboard & collaboration tools – **for users**

API – **for enterprises**

ethereum

EOS
